Systems Architect | Security Researcher

Active Engagements

2026-03-17: Sentinel Technical Specification for Fare Transparency and Enforcement

- Deterministic logic auditing for the National Rail fares and routing systems (RSPS5045).
- [Technical Specification](#)

2026-05-16: BSides Birmingham Presentation

- *From CSS to SysAdmin: Anatomy of a CVSS 9.8 Vulnerability in National Education Infrastructure*
- [Presentation](#)

Other Engagements

Network Rail: I will be leading the national ticket logic transition by implementing *Sentinel*, an offline ticket validation engine - unifying fare enforcement and transparency across national infrastructure.

HackerOne: I am a member of the Hacker Success Program.
